

■ CUBA MARITIME INTELLIGENCE REPORT

Open Source Intelligence (OSINT) — Vessel Tracking & Sanctions Monitoring

Report Date: 2026-04-13 | Generated: 2026-04-13 09:14 UTC | Classification: OSINT / UNCLASSIFIED

■■ **CRITICAL ALERT — ACTIVE SANCTIONS VIOLATION IN PROGRESS** Sanctioned Russian crude oil tanker ANATOLY KOLODKIN (IMO 9610808, 730,000 barrels) departed Primorsk, Russia on March 8, 2026. Analysts (Kpler, TankerTrackers) report vessel is en route to Matanzas, Cuba. AIS destination reads 'Atlantis' — spoofing suspected. Vessel is under US OFAC, UK HMT, and EU sanctions. OFAC expanded restrictions March 20, 2026, prohibiting Cuba from receiving Russian crude. Status: **ACTIVE THREAT**.

■ **OPERATION SOUTHERN SPEAR — U.S. Naval Interdiction Campaign | 7 dark fleet tankers seized (Dec 2025 – Feb 2026) | ~7 Million barrels intercepted | 17+ vessels still operating off Venezuela coast**

1. EXECUTIVE SUMMARY

Cuba faces a total energy collapse as of March 2026. The United States, under Operation Southern Spear (launched December 2025), has effectively disrupted Cuba's "dark fleet" oil supply network, seizing 7 shadow tankers carrying approximately 7 million barrels of Venezuelan and Russian crude oil destined for the island. Cuba is experiencing 18+ hour daily blackouts, airports have run out of jet fuel, and satellite imagery confirms a 50% reduction in nighttime illumination in major cities.

Russia is attempting to circumvent the US blockade by dispatching the sanctioned tanker ANATOLY KOLODKIN (730,000 barrels of Urals crude) from Primorsk port on March 8, 2026. OFAC expanded restrictions March 20, 2026, prohibiting Cuba from receiving Russian crude. Status: ACTIVE THREAT.

This report tracks 31 oil/cargo vessels and 17 Cuban military vessels (Marina de Guerra Revolucionaria) of intelligence interest. 15 oil vessels carry confirmed OFAC/EU/UK sanctions. Key networks: GAESA/Caroil Transport Marine Ltd. (Cyprus, OFAC 2019), Cubametales (OFAC July 2019), Sovcomflot/Rosnefteflot (Russian state). Military section covers MGR order of battle including SIGINT vessels, patrol craft, and coast guard units with recorded intelligence activity.

2. CURRENT OPERATIONAL ENVIRONMENT

■ Cuba Energy Crisis Status	18+ hour daily blackouts nationwide. Airports operating on emergency reserves. 50% reduction in nighttime illumination per Bloomberg satellite analysis. Total collapse of domestic fuel distribution infrastructure.
■ US Naval Blockade (Operation Southern Spear)	Ongoing since December 10, 2025. USSOUTHCOM and INDOPACOM conducting active interdiction. 7 tankers seized, 17+ vessels remain in Venezuelan waters under surveillance. Trump administration declared national emergency on Cuba (2026).
■ Russian Oil Delivery Attempt	ANATOLY KOLODKIN (Sovcomflot/Russian Govt) departed Primorsk March 8, 2026 with 730,000 bbls. AIS spoofing detected — vessel broadcasting "Atlantis" as destination. Second Russian tanker reportedly also en route per CNBC/Kpler analysis.
■ OFAC Expanded Cuba Sanctions (March 2026)	US Treasury OFAC added Cuba to list of countries prohibited from transactions involving Russian crude or petroleum products. Any vessel delivering Russian oil to Cuba now faces secondary sanctions risk. Enforcement mechanism under review.
■ Cuban "Dark Fleet" Collapse	Cuba's shadow fleet operated 9 core vessels using AIS spoofing, flag rotation (Panama, Cameroon, Guyana, Timor-Leste), name changes, and ship-to-ship transfers. Network severely disrupted by US seizures. 5 of 9 core vessels now in US custody.

3. VESSEL INTELLIGENCE REGISTRY

31 oil/cargo vessels of intelligence interest tracked. Sorted by risk level (CRITICAL → LOW). Sanctioned vessels marked ■. See Section 3.3 for Cuban Military Fleet order of battle.

3.1 CRITICAL RISK VESSEL PROFILES

■ VESSEL #1: AKADEMIK GUBKIN

■ SANCTIONED

IMO Number	9842190	MMSI	273616040
Vessel Type	Crude Oil Tanker	Flag State	Russia
Built	2023	DWT	114,000
Registered Owner	JSC Rosneftflot (subsidiary of PJSC Rosneft)	Operator	JSC Rosneftflot
Sanctioned By	OFAC (USA)	Sanction Date	2025-01-10
Risk Level	CRITICAL		

■ Sanction Reason: Property of sanctioned Rosneft Oil Company; transporting sanctioned Russian crude to Cuba

■ Intelligence Notes: [2026-04-13 14:00 UTC] Position: East Asia (4 days old) | Speed: data anomaly (67.5 kn reported - likely AIS error) | Draught: 9.0m (loading/ballast) | AIS: ACTIVE | Dest: NOT AVAILABLE | Last port: Nakhodka Anch., Russia (departed Apr 9). SECOND Russian oil shipment to Cuba announced by Energy Minister Tsiviliev Apr 2. If Cuba-bound, 30-45 day transit = arrival mid-May to late May 2026. Departure coincides with GL 134A expiration Apr 11 - this shipment faces FULL sanctions enforcement. Triple-sanctioned (US/UK/EU). MMSI: 273616040 (updated from 273466160). | Source: VesselFinder/Globe&Mail/UPI

■ VESSEL #2: ANATOLY KOLODKIN

■ SANCTIONED

IMO Number	9610808	MMSI	273253130
Vessel Type	Crude Oil Tanker	Flag State	Russia
Built	2013	DWT	118,316
Registered Owner	Sovcomflot / Russian Government	Operator	Sovcomflot
Sanctioned By	EU, UK (OFSI), US (OFAC)	Sanction Date	2024-11-25
Risk Level	CRITICAL		

■ Sanction Reason: Russian Shadow Fleet - illicit oil transport operations circumventing sanctions on Russia

■ Intelligence Notes: [2026-04-13 14:00 UTC] Position: NW Atlantic Ocean | Speed: 11.0 kn | Draught: 8.5m (BALLAST - offloaded) | AIS: ACTIVE (6 days old) | Dest: FOR ORDER | ETA: Apr 25 | Last port: Ust-Luga (departed Mar 6). Delivered 730K bbls Urals crude to Matanzas Mar 31. US allowed passage despite blockade. Now ballast returning. Triple-sanctioned (US/UK/EU). AKADEMIK GUBKIN departed Nakhodka Apr 9 as second Russian shipment. GL 134A expired Apr 11 - future shipments face full enforcement. | Source: VesselFinder/UPI/PBS/Euronews

4. OPERATION SOUTHERN SPEAR — SEIZURE TIMELINE

Dec 10, 2025

Source: USN/DOJ

SKIPPER (ex-ADISA) — VLCC

Seized by US Navy off Venezuela coast. Flying false Guyanese flag. Cargo: 1.8 million barrels Venezuelan crude. Of that, 1.1 million barrels destined for OFAC-sanctioned Cubametales. Civil forfeiture complaint filed DC.

Jan 7, 2026

Source: USSOUTHCOM

M SOPHIA (IMO 9289477)

USSOUTHCOM seizure in Caribbean Sea. Described as "stateless, sanctioned dark fleet motor tanker". AIS transponder off for approximately 5 months prior to capture. Flying false Panamanian flag at time of seizure.

Jan 7, 2026

Source: US Forces

MARINERA (ex-BELLA 1)

Seized by US forces in Atlantic Ocean near Iceland. Russian oil tanker. Changed name from BELLA 1 and changed flag to evade sanctions. Part of Russian shadow fleet delivering crude to Cuba and Venezuela.

Jan 15, 2026

Source: USSOUTHCOM

OLINA

5th seizure in US shadow fleet interdiction campaign. Caribbean Sea operation. Part of Venezuelan PdVSA shadow fleet. Operating under false flag. Exact IMO not confirmed in open sources.

Jan 20, 2026

Source: USSOUTHCOM

SAGITTA (IMO 9296822) — Aframax

USSOUTHCOM announcement: vessel "operating in defiance of President Trump's established quarantine of sanctioned vessels in the Caribbean." Owned by Hong Kong-based shell company. Sanctioned by US Treasury post-Ukraine invasion 2022.

Feb 9, 2026

Source: INDOPACOM

AQUILA II (IMO 9281152) — Suezmax

Seized by INDOPACOM in Indian Ocean — unprecedented deep water interdiction. History of extended dark activity (signal blackouts). Had departed Venezuelan waters January 2026 with ~700,000 barrels crude. Falsely broadcast as Panamanian-flagged. Expands US enforcement beyond Caribbean to global waters.

Mar 20, 2026

Source: OFAC/USSOUTHCOM

■■ ANATOLY KOLODKIN — ACTIVE THREAT

SANCTIONED Russian tanker (US/UK/EU) en route to Matanzas, Cuba. 730,000 barrels Russian Urals crude. AIS spoofing — broadcasting "Atlantis" as destination. OFAC expanded Russia oil sanctions to cover Cuba on this date. Status: APPROACHING CUBA. Interception decision pending.

5. SANCTIONS EVASION TACTICS & INDICATORS

■ AIS Spoofing / False Position Broadcasting	Vessels transmit false GPS coordinates or fake destinations. ANATOLY KOLODKIN broadcasts "Atlantis" while heading to Matanzas, Cuba. SEA HORSE broadcasted "not under command" approximately 1,300 nautical miles from Cuban waters while actually discharging cargo. Detection method: Cross-reference AIS with satellite imagery (Kpler, TankerTrackers).
■ AIS Blackouts / Signal Suppression	Vessels turn off AIS transponders entirely to disappear from tracking. M SOPHIA operated without transponder for approximately 5 months before US seizure. Creates "dark gaps" in vessel tracking history. Often combined with name changes during blackout periods. Detection: Gap analysis in AIS history, satellite SAR imagery.
■ False Flag Operations	Vessels register under different flags to avoid scrutiny. Common flags used by Cuba dark fleet: Panama, Cameroon, Guyana, Timor-Leste. SKIPPER flew false Guyanese flag. AQUILA II broadcast false Panamanian flag. Vessels cycle through multiple flags per voyage. Detection: Cross-check IMO against flag registry databases.
⇒ ■ Vessel Name / Identity Changes	Complete identity changes to remove vessel from sanctions tracking. Known changes: ADISA → SKIPPER, BELLA 1 → MARINERA, CARLOTA C → MARIA CRISTINA. Typically combined with new flag registration and shell company ownership changes. Detection: Track IMO numbers (permanent identifiers) rather than vessel names.
■ Ship-to-Ship (STS) Transfers	Cargo transferred between vessels at sea to obscure origin. SEA HORSE received ~190,000 barrels of Russian gasoil via STS transfer off Cyprus with AIS switched off. MARIA CRISTINA/OCEAN INTEGRITY/PRIMULA serve as floating storage for STS operations. Detection: Satellite imagery of anchorage areas, anomalous speed patterns.
■ Shell Company Networks	Beneficial ownership concealed through layers of shell companies. Key network: Caroli Transport Marine Ltd. (Cyprus) → Sanctioned 2019, operates on behalf of GAESA. Ran SANDINO, PETION, CARLOTA C. Typical structure: Vessel → Marshall Islands LLC → Cyprus management → Hong Kong beneficial owner → Russian/Venezuelan state entity. Detection: Beneficial ownership databases, Panama/Pandora Papers analysis.
■ Circumvention Routes	Standard Cuba shadow fleet route: Venezuela (Ust-Luga or José Terminal) → Atlantic/Caribbean → Matanzas or Cienfuegos, Cuba. Secondary route via STS transfers near Canary Islands or Cyprus. Russian crude route: Primorsk/Ust-Luga → Atlantic → Cuba or Venezuela. Co-loading: Mix sanctioned and non-sanctioned cargo to create plausible deniability.

6. SANCTIONED ENTITIES & GHOST COMPANY NETWORK

Entity	Type	Designation Date	Authority	Intelligence Summary
Cubametales	Cuba State Oil Entity	July 3, 2019	OFAC (E.O. 13850)	Cuban state-run oil import/export company. Primary conduit for illicit oil deliveries to Cuba. 1.1 million barrels from seized SKIPPER were destined for Cubametales. Continues to operate through third-party intermediaries and dark fleet networks. All transactions with Cubametales by US persons or entities in US jurisdiction are prohibited.
GAESA (Grupo de Administración Empresarial S.A.)	Cuban Military Conglomerate	Various	State Dept. / OFAC	Cuba's military's largest commercial conglomerate. Controls majority of Cuba's hard currency economy. Operates shipping vessels through shell companies including Caroil Transport Marine Ltd. Connected to FINCIMEX (remittance), CIMEX (retail), and Mambisa (shipping). All subsidiaries should be treated as sanctioned entities for compliance purposes.
Caroil Transport Marine Ltd.	Cyprus-Based Shell Company	July 3, 2019	OFAC (E.O. 13850)	Cyprus-based front company operating on behalf of GAESA Cuban military. Operated vessels: SANDINO (IMO 9441178), PETION (IMO 9295098), CARLOTA C (now MARIA CRISTINA, IMO 9502453). All three vessels continued operating post-sanction, sailing between Venezuela, Mexico, and Cuba. Company remains nominally active in Cyprus company registry as of 2025.
Sovcomflot / JSC Rosnefteflot	Russian State Shipping	February 24, 2022 / Ongoing	OFAC (E.O. 14024)	Russian state shipping company responsible for transporting Russian crude oil to Cuba. Operates ANATOLY KOLODKIN (IMO 9610808) and AKADEMIK GUBKIN (IMO 9842190). Volume of Russian deliveries to Cuba: 600,000 tonnes (2022) → 100,000 tonnes (2024). Currently attempting to deliver 730,000 barrels via ANATOLY KOLODKIN (March 2026).
PdVSA (Petróleos de Venezuela)	Venezuelan State Oil Company	January 28, 2019	OFAC	Venezuelan state oil company. Primary supplier of crude oil to Cuba under PDVSA-Cuba agreements. Supplied Cuba 27,000-35,000 barrels/day of crude via dark fleet vessels. SKIPPER cargo of 1.8 million barrels originated from PdVSA facilities. Uses dark fleet intermediaries to circumvent US sanctions on Venezuelan crude.

7. CUBA PORT INTELLIGENCE

Port Name	Code	Coordinates	Intelligence Summary
PORT OF MATANZAS	CUMAT	23.04°N, 81.56°W	Primary oil terminal. Main destination for dark fleet crude deliveries. ANATOLY KOLODKIN reportedly headed here March 2026. Operated by CUPET (Cuba Petroleum). Capacity: ~1M bbl storage. Pipeline connections to Havana. Regular tanker traffic.
PORT OF CIENFUEGOS	CUCFG	22.14°N, 80.44°W	Major oil and refinery port (Camilo Cienfuegos refinery). 5 piers + 3 buoy moorings. ~100 vessels/year. Handles Venezuelan crude for refining. Frequent tanker traffic. Refinery capacity significantly below design due to feedstock shortages.
PORT OF HAVANA	CUHAV	23.14°N, 82.35°W	Cuba's main commercial port. ~270,000 TEU annually. 400+ vessel calls/year. Handles container, general cargo, and passenger traffic. SEABOARD GALAXY (food/reefer from New Orleans) typical authorized US trade. Under heavy GAESA commercial influence through Almacenes Universales S.A.
PORT OF MARIEL	CUMAR	22.99°N, 82.76°W	Cuba's premier container terminal. Handles food imports (primary source post-2015). SEABOARD GALAXY route: New Orleans → Mariel (food, refrigerated products). Neopanamax-capable since 2023 expansion. Chinese investment (COSCO connection). ~100 vessels/year. Key GAESA-controlled terminal (ICTSI partnership dissolved 2022).
GULF OF BATABANO	ANCHORAGE	22.7°N, 82.1°W	Unofficial anchorage area south of Cuba. Used for STS transfers by dark fleet vessels. Poor AIS coverage allows covert transfer operations. MARIA CRISTINA, OCEAN INTEGRITY, PRIMULA operate in this zone for floating storage.

9. INTELLIGENCE ASSESSMENT & RECOMMENDATIONS

■ HIGH CONFIDENCE ASSESSMENT

Cuba's oil supply network has been severely disrupted by Operation Southern Spear. The island is in an acute energy crisis. Russia is the last remaining supplier willing to risk confrontation with US naval forces. The ANATOLY KOLODKIN situation (March 2026) represents the most significant test of US blockade enforcement to date.

■ PROBABLE COURSES OF ACTION (Cuba/Russia)

1. ANATOLY KOLODKIN attempts discharge at Matanzas (high probability within 7 days). 2. Additional Russian tankers dispatched with enhanced AIS spoofing and naval escorts. 3. Cuba seeks alternative supply through China intermediaries (COSCO connection via Mariel). 4. Expanded use of STS transfers in international waters beyond US interdiction range. 5. Cuba-Russia diplomatic escalation to create legal/political obstacles to seizures.

■ SANCTIONS COMPLIANCE ALERT

Entities handling Cuba-destined cargo, providing port services to listed vessels, or engaging in ship-to-ship transfers with Cuban dark fleet vessels are at risk of OFAC secondary sanctions. Key risk indicators: vessels with AIS gaps, recent flag/name changes, opaque beneficial ownership, routing through Cuba, Venezuela, or Russia.

■ RECOMMENDED ACTIONS

1. Monitor ANATOLY KOLODKIN (IMO 9610808) AIS signal and satellite track continuously. 2. Alert port authorities at Matanzas, Cienfuegos, Havana of high-risk vessel approach. 3. Screen all vessels calling Cuba ports against OFAC SDN list and IMO database. 4. Track STS transfer activity in Gulf of Batabano and Caribbean anchorage areas. 5. Monitor Cuban state entities: Cubametales, GAESA, CUPET for new shell company registrations. 6. Cross-reference vessel movements with satellite data to detect AIS spoofing.
